Zones 2 & 3 are Water for targets in Germany, and are England for targets in France and Belgium

Notes: Where possible, Flight Log Gazetteers have been compared with Magus Kimura's impressive *Friday the 13th* Campaign. Differences and errors are mine. The night target list has been ahistorically weighted toward industry and away from V-weapons for game purposes. The day target list is short, as day operations for 314 Sqdn will be ahistorically infrequent, again for game purposes.
