

314 Squadron

	Assigned Mission	Aborted Unauth.	Bombs on Target (%)	Safe Return	Crew Lost	Individual Result
Boom Shot	Y	N	0	N	1	Loss
Hell's Bells	Y	N	30	Y	0	Win
PM020	Y	N	0	Y	0	Draw
Shady Samantha	Y	N	40	Y	0	Win
Lady Black's Tea Party	Y	N	40	Y	0	Win
Home Girl	Y	N	0	Y	0	Draw
J-Jam	Y	N	40	Y	0	Win
F-Fox	Y	N	30	Y	0	Win
Belligerent Bulldog	Y	N	0	N	0	Loss
Burke and Beyond	Y	N	0	Y	0	Draw
Flying Corpses	Y	Y				
Caesar! Sentenced to death salute you!	Y	Y				
Michael Sword	Y	N	0	N	7	Loss
IMO J.Rudlicki	Y	Y				
	14	3	12.9	8	8	18.2%

Zone: 9

Target: Pforzheim

Bombs on Target:	12.9 Percent	Fair
Lancaster Survival Expectation:	3.9 Missions	Poor
Crew Survival Expectation:	10.2 Missions	Fair
Individual Results:	18.2 Percent	Draw

Substantive Luftwaffe Victory

Analysis Notes

The analysis is based, somewhat, on the criteria in section 7.0 of the rules, “How to Win.”

Victory Conditions

Listed as “Individual Result” on the spreadsheet, a crew records a Win if their bomb run is On Target, and the aircraft is fit for further missions. A Loss is recorded if the aircraft cannot fly further missions. Any other outcome is a Draw.

The standard for the Squadron is based on considering an individual win as +1, an individual draw as zero, and an individual loss as -1. The Squadron has a win if the average of these values exceeds half the standard deviation. The Squadron has a Loss if the crews have more losses than wins. Any other result is a Draw. For the purpose of calculating an overall result for the group, +1 point is awarded for a win, and -1 point is awarded for a loss. Zero points are awarded for a draw.

Crews and aircraft that do not fly, for whatever reason, do not affect this determination.

Bomb Run Result

The average bomb run percentage (“BOT Pct”) for all crews assigned to the mission, including those that do not fly (“Abort Unauth.”) is calculated and compared to the chart in section 7.3. For the purpose of calculating an overall mission result for the group, +1.5 points are awarded for an Excellent result, +0.5 for Good, -0.5 for Fair, and -1.5 for Poor.

Lancaster and Crew Survival Expectation

A Lancaster and a Crew Member loss rate per zone are each calculated. The reciprocal of this rate is the most likely number of zones a Lancaster or Crew Member could expect to survive. This is converted to an expected number of missions based on the weighted average target distance of 9.33 zones in a “Battle of Berlin” campaign. The results are compared to the chart in section 7.3. For both Lancaster Survival and Crew Survival, when calculating an overall mission result for the group, +2 points are awarded for an Superb result, +1 for Excellent, zero for Good, -1 for Fair, and -2 points for Poor.

Crews and aircraft that do not fly, for whatever reason, do not affect this determination.

Overall Squadron Result

While all these criteria might be measuring the same thing (e.g., if the Luftwaffe does well, there will probably be more individual losses than wins, a low bomb run average, and poor survival expectations), the two survival expectations are probably most closely related. Thus, the points for the two survival expectations are averaged, then added to the sum of points for Individual Results and Bomb Run Results. Totals between -1 and +1 indicate a Draw. Bomber Command wins with totals +1 or greater, while the Luftwaffe wins with results -1 or less. Because my youth was spent playing SPI games, victories are Marginal with totals from +/- 1 to +/- 2, Substantive with totals from +/- 2 to +/- 3, and Decisive with totals from +/- 3 or beyond.
